

HOKULANI

HOKULANI

Hull No. 1 of the PJ150 series from American shipyard Palmer Johnson, 46m HOKULANI is a wonder of her own. Maintained in perfect condition by her professional and attentive crew since her launch in 2007, HOKULANI is certainly the best in class. No other PJ150 superyacht available on the market or similar yacht have had the upgrades, improvements or care that HOKULANI has had. Offering accommodation for up to 10 guests in 5 staterooms plus quarters for 7 crew members, HOKULANI ensures the best quality time on board.

Her champagne coloured Hull & superstructure, designed by Palmer Johnson in collaboration with Bugatti along with the talent of Nuvolari Lenard studio, have engineered traits such as the accentuated centre line, perfect symmetry and sweeping curves adding to her already very sporty attitude. Revolutionary in her style at the time, and still accurate today, HOKULANI features some bright exterior functionality such as her wide and social Main deck with sun lounge area and dining, or her Sun deck with a large a glass atrium roof panel that slides fore & aft: you can choose to cruise either in the sun or in the shade! Further uses of space include a custom swim platform with a self-deploying ladder and a hydraulically powered tender garage able to welcome a large tender and additional jet skis and water toys.

The perfect condition of HOKULANI is reflected in the quality of her interiors: her new dark wooden floors achieved in 2019 are perfectly matching with the neutral and bright atmosphere, enhanced by large windows throughout the Main deck salon, which also includes a dining area for 10 to 12 guests. Following a large corridor is the access to the Cinema room with brand new audio/video system also achieved in 2019, and private access to the full-beam en-suite Master cabin, including a lobby with a walk-in wardrobe, a king-sized bed with a study area to starboard, a fully-equipped bathroom and a seating area to port. Four additional cabins are available on board, with two VIP cabins with double beds and two Twin cabins with 2 x single beds. All Guest cabins have en-suite facilities.

On the Crew side, HOKULANI offers first a sleek raised bridge which has masterfully fused fashion and function, also refitted in 2019 with new upholstery. The Crew Mess / Galley area is fully functional and social to ensure the wellness of the crew, with direct access to the accommodation for up to 7 members. Powered by twin responsive MTU diesel engines, this head turning sports cruiser can accelerate to a rousing speed underway of 26 knots. The engine creates 3,650 horse power (2,723 kilowatts), for a total HP of 7,300HP (5,446kW). In addition, HOKULANI is one of the only superyacht of this style with zero speed fin stabilizers.
